

NEW for January 2017

Silent Gliss Dim-Out Blind Systems

Adjustable Shading for the Workplace. The new Silent Gliss dim-out system provides the ideal solution for room darkening, fabric is tensioned and zipped into side profiles, and combined with the brush strips they provide the perfect blackout. The systems are simple to use with a choice of chain or electric operation.

Offered in three sizes (small, medium and large), to accommodate a wide range of window sizes. Profiles are supplied black or white powder coated.

Simple to install in just a few simple steps with profiles fixed directly to the wall or ceiling costs are kept to a minimum. Effortless.

Designed For Purpose. Perfectly positioned – perfectly tensioned. The unique two-component ZIP system ensures smooth and consistent movement. The fabric is perfectly tensioned at all times and the side profiles enable optimum placement in front of windows or other glass partitions.

Blackout at the push of a button. The dim-out blind system is offered with chain or electric operation. When electrically operated, a radio remote control and the Silent Gliss Move app are available. The Move app allows rooms to be automatically darkened at a specific times, even pre-programmed for upcoming events!
