

Motor: Yes – Wires: No

New: Silent Gliss Battery Operated Roller and Roman Blind

Today's architecture and interior design must continue to meet the highest aesthetic standards, offering maximum convenience and concealed technology.

The Silent Gliss battery-operated roller and roman blind systems fulfil these requirements by offering wireless shading at the push of a button.

For situations when wiring to a window is just not possible the Silent Gliss battery operated blinds the ideal retrofit solution.

The elegant design uses clean lines and high-quality materials to suit a wide range of interiors. The roller blind can be fitted with the fascia hidden or featured front with a choice of 3 bottom bar designs. Both blind systems are easily operated using a wall switch, and/or radio remote control.

Silent Gliss battery blinds use conventional batteries with a service life of up to three years. The batteries are contained within an easily accessible holder for an easy exchange.
