# SG 6650

SAFETY DEVICE

PRODUCT INFORMATION

– **Operation:** hand

– **Range:** S-L

– **Fitting:** suspended, ceiling, wall

– **Colours:** Anodised aluminum, special colours possible

– **Fabrics:** refer to Silent Gliss fabric collection

Features:

– *Quick release safety device; for high risk areas to reduce opportunity for self harm*

– *Progressive disconnection of friction-based joints, wall supports and brackets at maximum static load of 40 kg*

– *Simple re-connection of hangers and brackets after separation*

– *For use with SG 6100*

The SG 6650 system is intended to reduce the risk of self-harm in cubicle situations:

– **It must be fitted in accordance with the specific SG 6650 fitting instructions and only by approved Silent Gliss installers.**

– **Failure to do so will reduce its effectiveness.**

– Fixings should support ends of profile plus changes in direction.

– Maximum span between supports is 2.5 m. Position of supports can affect the performance of the system.

– At each hanger position a noggin in approved material is required above the suspended ceiling; to rest on top of ceiling (but independently supported), with a minimum length of 300 mm at right angles to the track in which the hanger occurs to give fixing tolerance.

– All completed systems must be risk assessed by a qualified installer.

– As universal room divider system with various accessories,
  there are almost no limits to size and layouts.

– The recommended height from finished floor level to the
  underside of track is 2100 mm

– Typical method of obtaining stability is by attaching the
 system to the corridor wall or window.
